

TECHNICAL SHEET

Sweeper Pack Preparation for SCANIA with 'P' type cabin

OBJECTIVE

To make both sides of the frame available for bodybuilder **sweeper** equipment.

DESIGN NOTES

- Solution is designed for vehicles with 7L engines (DC07) 220, 250 or 280.
- Vehicle must be ordered with a 200L aluminium fuel tank and vertical exhaust system.
- Component support structure behind the cabin to facilitate component repackaging.
- Relocation of muffler to central position and rerouting of new insulated exhaust pipework.
- Ad-Blue tank relocated to the left side with air tanks on both left and right sides.
- S.T. System Truck vertical battery box to optimise space on the right side.
- Fuel tank is relocated to inside the frame in the vehicle overhang.
- Installation of original Scania rear under protection group (to be supplied by customer).

Layout drawings are available for various wheelbase lengths and figurations.
